Preface	ix
1 Basic equations for shallow water waves	1
1.1 Introduction	1
1.2 The three-dimensional Euler equation	1
1.3 The Benney–Luke equation	5
1.4 The KP equation with higher order corrections	6
1.5 Normal form for the higher order problem	8
Exercises	16
2 Introduction to the KP theory and the τ-function	21
2.1 Introduction	21
2.2 The Burgers hierarchy	21
2.3 The multicomponent Burgers equation and the τ -function . .	28
2.4 Lax–Sato theory of the KP hierarchy	40
2.5 Bilinear identity of the τ -function	47
Exercises	49
3 The real Grassmannians and their parametrizations	55
3.1 Introduction	55
3.2 Soliton solutions and the Grassmannians	55
3.3 The real Grassmannian	56
3.4 The Schubert decomposition	57
3.5 The Deodhar decomposition	65
3.6 Plücker coordinates for the Go-diagram and the positivity . .	73
Exercises	87
4 Classification of the KP solitons	89
4.1 Introduction	89
4.2 Soliton graphs $\mathcal{G}_i(\mathcal{M}(A))$	89
4.3 Classification theorem	92
4.4 Duality between $\text{Gr}(N, M)_{\geq 0}$ and $\text{Gr}(M - N, M)_{\geq 0}$	100
4.5 The N -soliton solutions	103
4.6 Exact solutions for low-dimensional cases	108
Exercises	119
5 Soliton graphs	121
5.1 Soliton graphs $\mathcal{G}_{\pm}(\mathcal{M}(A))$	121
5.2 Construction of the soliton graphs	125

5.3	Soliton graphs and triangulations of point set	129
5.4	Subdivisions $Q_{N,M}(\omega)$ for $\text{Gr}(N, M)_{>0}$	137
5.5	KP hierarchy and polyhedral structure of soliton graphs	146
	Exercises	157
6	Stability and numerical simulations	159
6.1	Introduction	159
6.2	Stability of one line-soliton	160
6.3	Stability for some exact solutions: Numerical study	165
6.4	Numerical scheme for the KP equation	186
	Exercises	190
7	The inverse problem	193
7.1	Introduction	193
7.2	Examples of real waves	193
7.3	Basic KP solitons	194
7.4	Inverse problem	198
7.5	Examples	204
	Exercises	207
8	The Mach reflection: The Miles theory and the higher order KP theory	209
8.1	Introduction	209
8.2	Mach reflection phenomenon in shallow water	209
8.3	The Miles theory	210
8.4	The KP theory	217
8.5	Numerical scheme for the Euler equation	220
8.6	Higher order KP solitons for the reflection problem	225
8.7	Analysis of the numerical results using the higher order KP theory	231
8.8	Laboratory experiments	236
	Exercises	240
	Bibliography	241
	Index	251
