

# Contents

<b>Preface</b>	<b>ix</b>
<b>1 Review of multivariate calculus and differential equations</b>	<b>1</b>
1.1 Differentiability, linearization . . . . .	1
1.2 Ordinary differential equations . . . . .	3
1.3 Numerical methods for solving ordinary differential equations . . . . .	10
1.4 Notes and comments . . . . .	29
Exercises . . . . .	30
<b>2 Compartment models</b>	<b>31</b>
2.1 Simple compartment models . . . . .	32
2.2 Interacting population models . . . . .	43
2.3 Subcompartment models . . . . .	51
2.4 Notes and comments . . . . .	56
Exercises . . . . .	60
<b>3 From compartment models to continuous models</b>	<b>63</b>
3.1 Refining compartment partitioning . . . . .	63
3.2 Age-structured models: From discrete to continuous . . . . .	70
3.3 Notes and comments . . . . .	79
Exercises . . . . .	80
<b>4 Dimensional analysis and scaling</b>	<b>83</b>
4.1 Model scaling: A preliminary example . . . . .	83
4.2 Dimensional analysis . . . . .	87
4.3 Refining the models: Expansion parameters . . . . .	103
4.4 Notes and comments . . . . .	105
Exercises . . . . .	107
<b>5 Introduction to stochastic modeling</b>	<b>109</b>
5.1 Random variables, distributions, and densities . . . . .	111
5.2 Sampling and histograms . . . . .	123
5.3 Notes and comments . . . . .	130
Exercises . . . . .	131

---

<b>6</b>	<b>Modeling noise</b>	<b>133</b>
6.1	Counting processes and Poisson noise . . . . .	141
6.2	Modeling multichannel noise . . . . .	146
6.3	Temporal analysis: Autocovariance function . . . . .	148
6.4	Spatiotemporal noise and Kronecker products . . . . .	153
6.5	Notes and comments . . . . .	155
	Exercises . . . . .	155
<b>7</b>	<b>Modeling with waiting processes</b>	<b>159</b>
7.1	Neuron firing and biological noise . . . . .	159
7.2	Stochastic simulation of chemical kinetics . . . . .	167
7.3	Photon migration and Levy flight . . . . .	176
7.4	Notes and comments . . . . .	181
	Exercises . . . . .	182
<b>8</b>	<b>Markov processes</b>	<b>183</b>
8.1	Markov processes and random walks . . . . .	183
8.2	Stochastic predator-prey model . . . . .	190
8.3	Notes and comments . . . . .	197
	Exercises . . . . .	197
<b>9</b>	<b>Cellular automata, agent-based modeling</b>	<b>199</b>
9.1	Markov processes: Temporal and spatial . . . . .	199
9.2	Notes and comments . . . . .	211
	Exercises . . . . .	212
	<b>Bibliography</b>	<b>215</b>
	<b>Index</b>	<b>219</b>
