<b>Foreword</b>	<b>xi</b>
<b>Preface</b>	<b>xiii</b>
<b>I Fundamentals</b>	<b>1</b>
<b>1 Introduction</b>	<b>3</b>
T. Koch, M. E. Pfetsch, J. Rövekamp	
1.1 Mathematical characteristics and challenges . . . . .	3
1.2 Stationarity . . . . .	4
1.3 Basic tasks . . . . .	5
1.4 State of the art and new methodology . . . . .	6
1.5 Fundamentals of gas transmission . . . . .	6
1.6 Transport networks . . . . .	11
<b>2 Physical and technical fundamentals of gas networks</b>	<b>17</b>
A. Fügenschuh, B. Geißler, R. Gollmer, A. Morsi, M. E. Pfetsch, J. Rövekamp, M. Schmidt, K. Spreckelsen, M. C. Steinbach	
2.1 Gas transport . . . . .	18
2.2 Gas properties . . . . .	19
2.3 Gas network elements . . . . .	23
2.4 Gas network structures . . . . .	37
2.5 Gas network representation . . . . .	42
<b>3 Regulatory rules for gas markets in Germany and other European countries</b>	<b>45</b>
U. Gotzes, N. Heinecke, B. Hiller, J. Rövekamp, T. Koch	
3.1 Overview of gas market regulation in Europe and Germany . . . . .	46
3.2 Current rules for using gas transmission networks . . . . .	48
3.3 Current rules for determining capacities . . . . .	56
3.4 Challenges for gas transmission system operators . . . . .	62
3.5 Summary and outlook . . . . .	64
<b>4 State of the art in evaluating gas network capacities</b>	<b>65</b>
D. Bargmann, M. Ebberts, N. Heinecke, T. Koch, V. Köhl, A. Pelzer, M. E. Pfetsch, J. Rövekamp, K. Spreckelsen	
4.1 Background for capacity evaluation and simulation . . . . .	67
4.2 Generation of scenarios . . . . .	68

4.3	Network control options in simulation . . . . .	78
4.4	Simulation . . . . .	81
4.5	Interpretation of calculation results . . . . .	83
4.6	Conclusions . . . . .	84
<b>II</b>	<b>Validation of nominations</b>	<b>85</b>
<b>5</b>	<b>Mathematical optimization for evaluating gas network capacities</b>	<b>87</b>
	L. Schewe, T. Koch, A. Martin, M. E. Pfetsch	
5.1	The building blocks of our hierarchy . . . . .	88
5.2	Abstract problem statement . . . . .	94
5.3	Additional modeling considerations . . . . .	96
5.4	Pre- and postprocessing . . . . .	98
5.5	Overview of the literature . . . . .	100
5.6	Overview of our approaches . . . . .	101
<b>6</b>	<b>The MILP-relaxation approach</b>	<b>103</b>
	B. Geißler, A. Martin, A. Morsi, L. Schewe	
6.1	An MINLP model for the validation of nominations . . . . .	103
6.2	An MILP relaxation of the MINLP model . . . . .	114
<b>7</b>	<b>The specialized MINLP approach</b>	<b>123</b>
	J. Humpola, A. Fügenschuh, B. Hiller, T. Koch, T. Lehmann, R. Lenz, R. Schwarz, J. Schweiger	
7.1	Passive pipe networks . . . . .	124
7.2	From passive pipe networks to gas networks with active devices . . .	130
7.3	Element modeling . . . . .	134
7.4	Conclusion . . . . .	143
<b>8</b>	<b>The reduced NLP heuristic</b>	<b>145</b>
	R. Gollmer, R. Schultz, C. Stangl	
8.1	Reduction of variables . . . . .	146
8.2	Constraints for active elements . . . . .	150
8.3	Objective function . . . . .	154
8.4	Summary of the model . . . . .	155
8.5	Heuristics to fix binary decisions . . . . .	156
8.6	Conclusion . . . . .	162
<b>9</b>	<b>An MPEC based heuristic</b>	<b>163</b>
	M. Schmidt, M. C. Steinbach, B. M. Willert	
9.1	Model . . . . .	165
9.2	MPEC regularization . . . . .	175
9.3	Solution technique: A two-stage approach . . . . .	176
<b>10</b>	<b>The precise NLP model</b>	<b>181</b>
	M. Schmidt, M. C. Steinbach, B. M. Willert	
10.1	Component models . . . . .	182
10.2	Objective functions . . . . .	207
10.3	Relaxations . . . . .	208
10.4	A concrete validation model . . . . .	209

<b>11</b>	<b>What does “feasible” mean?</b>	<b>211</b>
	I. Joormann, M. Schmidt, M. C. Steinbach, B. M. Willert	
11.1	Feasible network operation . . . . .	211
11.2	Availability and accuracy of model data . . . . .	213
11.3	How “feasible” are solutions of our models? . . . . .	214
11.4	NLP validation vs. network simulation . . . . .	216
11.5	The interpretation of ValNLP solutions . . . . .	221
11.6	Analyzing infeasibility in a first stage model . . . . .	224
<b>12</b>	<b>Computational results for validation of nominations</b>	<b>233</b>
	B. Hiller, J. Humpola, T. Lehmann, R. Lenz, A. Morsi, M. E. Pfetsch, L. Schewe, M. Schmidt, R. Schwarz, J. Schweiger, C. Stangl, B. M. Willert	
12.1	Introduction . . . . .	233
12.2	Results for the MILP-relaxation approach . . . . .	236
12.3	Results for the specialized MINLP approach . . . . .	242
12.4	Results for the reduced NLP heuristic . . . . .	249
12.5	Results for the MPEC based heuristic . . . . .	252
12.6	Results for the validation NLP . . . . .	260
12.7	Comparison of the decision approaches and combined solver . . . . .	264
<b>III</b>	<b>Verification of booked capacities</b>	<b>271</b>
<b>13</b>	<b>Empirical observations and statistical analysis of gas demand data</b>	<b>273</b>
	H. Heitsch, R. Henrion, H. Leövey, R. Mirkov, A. Möller, W. Römisich, I. Wegner-Specht	
13.1	Descriptive data analysis and hypothesis testing . . . . .	274
13.2	Reference temperature and temperature intervals . . . . .	279
13.3	Univariate distribution fitting . . . . .	280
13.4	Multivariate distribution fitting . . . . .	283
13.5	Forecasting gas flow demand for low temperatures . . . . .	286
<b>14</b>	<b>Methods for verifying booked capacities</b>	<b>291</b>
	B. Hiller, C. Hayn, H. Heitsch, R. Henrion, H. Leövey, A. Möller, W. Römisich	
14.1	Motivation and outline of the approach . . . . .	292
14.2	Sampling statistical load scenarios for verifying booked capacities . . . . .	295
14.3	Generating quantiles for verifying booked capacities . . . . .	301
14.4	Modeling capacity contracts . . . . .	303
14.5	An adversarial heuristic for generating booking-compliant nominations . . . . .	305
14.6	Methods to verify booked capacities . . . . .	308
14.7	Computational results for verifications of booked capacities . . . . .	310
14.8	Conclusions . . . . .	314
<b>15</b>	<b>Perspectives</b>	<b>317</b>
	C. Hayn, J. Humpola, T. Koch, L. Schewe, J. Schweiger, K. Spreckelsen	
15.1	Physical models and transient effects . . . . .	317
15.2	Modeling flow situations . . . . .	318
15.3	Determining maximal capacities . . . . .	319
15.4	Extending the network . . . . .	320

---

15.5	Making it work in practice . . . . .	322
15.6	Outlook . . . . .	323
<b>A</b>	<b>Background on gas market regulation</b>	<b>325</b>
	J. Rövekamp	
A.1	Legislative power, authorities, and organizations . . . . .	325
A.2	Chronology of European and German gas market regulation . . . . .	327
A.3	Ongoing and future activities . . . . .	330
	<b>Acronyms</b>	<b>331</b>
	<b>Glossary</b>	<b>333</b>
	<b>Regulation and gas business literature</b>	<b>339</b>
	<b>Bibliography</b>	<b>345</b>
	<b>Index</b>	<b>361</b>
