List of Figures	vii
List of Algorithms	ix
Preface	xi
1 Introduction	1
1.1 Tensors (Hypermatrices)	1
1.2 Tensor Multiplication	3
1.3 Tensor Decomposition and Tensor Rank	5
1.4 Several Structured Tensors	7
1.5 Four Classes of Special Tensors and the Theme of This Book	8
1.6 Notes	11
1.7 Exercises	13
2 Eigenvalues of Tensors	15
2.1 Eigenvalues and H-Eigenvalues	15
2.2 E-Eigenvalues and Z-Eigenvalues	26
2.3 Generalized Eigenvalues	31
2.4 Computational Methods for Eigenvalues	32
2.5 Notes	39
2.6 Exercises	41
3 Nonnegative Tensors	43
3.1 The Perron-Frobenius Theorem for Irreducible Nonnegative Tensors	45
3.2 Weakly Irreducible Nonnegative Tensors and Positive Eigenvalue	55
3.3 Strongly Nonnegative Tensors and Existence of a Positive Perron Vector	63
3.4 The Perron-Frobenius Theorem for Homogeneous, Monotone Functions*	77
3.5 The Cyclic Index, Primitive Tensors, and Weakly Primitive Tensors	85
3.6 Symmetric Nonnegative Tensors	95
3.7 Algorithms for Computing the Largest Eigenvalue of a Nonnegative Tensor	98
3.8 Essentially Nonnegative Tensors and Some Further Properties of Nonnegative Tensors	105
3.9 Higher Order Markov Chains, Transition Probability Tensors, and Stochastic Tensors	110

3.10	Notes	117
3.11	Exercises	119
4	Spectral Hypergraph Theory via Tensors	121
4.1	Spectral Properties of \mathcal{A} , \mathcal{L} , and \mathcal{Q}	122
4.2	Graph Invariants for Uniform Hypergraphs	129
4.3	Odd-Bipartite Hypergraphs	137
4.4	Hypergraphs with Large or Small Spectral Radius	151
4.5	Computing Extremal Eigenvalues of Large Scale Sparse Tensors of Hypergraphs	156
4.6	Spectral Theory for Directed Hypergraphs	161
4.7	Multi-Hypergraphs, Non-Uniform Hypergraphs, and Random Hypergraphs	166
4.8	Notes	169
4.9	Exercises	171
5	Positive Semidefinite Tensors	173
5.1	Positive Semidefiniteness	173
5.2	Inclusion Sets for Tensor Eigenvalues	178
5.3	Diagonally Dominated Tensors and Their Extensions	186
5.4	M -Tensors and H -Tensors	191
5.5	B_0 - and B -Tensors	201
5.6	SOS Tensors	205
5.7	PSD Hankel Tensors	212
5.8	Notes	233
5.9	Exercises	236
6	Completely Positive Tensors and Copositive Tensors	237
6.1	Properties of Completely Positive Tensors	238
6.2	Strongly Symmetric Hierarchically Dominated Nonnegative Tensors	243
6.3	Positive Cauchy Tensors and Nonnegative Strong Hankel Tensors	247
6.4	Other Checkable Subclasses of Completely Positive Tensors	255
6.5	Copositive Tensors	261
6.6	Notes	268
6.7	Exercises	269
	Bibliography	271
	Index	303
