Preface	vii
1 The Hardy–Littlewood maximal operator	1
1.1 The Hardy–Littlewood operator	1
1.2 The Lebesgue derivation theorem	3
1.3 Regular families	5
1.4 Control of some convolutions	5
1.5 Exercises	7
2 Principal values, and some Fourier transforms	11
2.1 Operators commuting with translations	11
2.2 Principal values	13
2.3 Some Fourier transforms	14
2.4 Homogeneous kernels	16
2.5 Exercises	22
3 The Calderón–Zygmund theory	27
3.1 The dyadic cubes	27
3.2 The Calderón–Zygmund decomposition	28
3.3 Singular integrals	29
3.4 Exercises	36
4 The Littlewood–Paley theory	39
4.1 Vector-valued singular integrals	39
4.2 The Littlewood–Paley inequalities	40
4.3 The Marcinkiewicz multiplier theorem	43
4.4 Exercises	49
5 Higher Riesz transforms	51
5.1 Spherical harmonics	51
5.2 Higher Riesz transforms	55
5.3 Nonsmooth kernels	58
5.4 Exercises	60
6 BMO and H^1	63
6.1 The BMO space	63
6.2 The $H^1(\mathbb{R}^n)$ space	67
6.3 Duality of H^1 –BMO	69
6.4 Exercises	71

7	Singular integrals on other groups	75
7.1	The torus	75
7.2	\mathbb{Z}	78
7.3	Some totally disconnected groups	80
7.4	Exercises	87
8	Interpolation	89
8.1	Real methods	89
8.2	Complex methods	93
8.3	Exercises	97
A	Background material	99
A.1	Vector-valued integrals	99
A.2	Convolution	99
A.3	Polar coordinates	100
A.4	Distribution functions and weak L^p spaces	100
A.5	Laplace transform	101
A.6	Khintchine inequalities	102
A.7	Exercises	103
B	Notation and conventions	109
B.1	Glossary of notation and symbols	109
B.2	Conventions	110
	Postface	111
	Bibliography	113
	Index	115
