*Using Mathematical Methods and  
Innovative Analytical Techniques*

**EDITOR-IN-CHIEF  
ARND SCHEEL  
UNIVERSITY  
OF MINNESOTA**

Publishes research articles of the highest quality employing innovative analytical techniques to treat problems in the natural sciences. Every paper has content that is primarily analytical and that employs mathematical methods in such areas as partial differential equations, the calculus of variations, functional analysis, approximation theory, harmonic and wavelet analysis, or dynamical systems. Additionally, every paper relates to a model for natural phenomena in such areas as fluid mechanics, materials science, quantum mechanics, biomathematics, and mathematical physics, or to the computational analysis of such phenomena.
