

Francesco Maggi is Associate Professor of Mathematics at the University of Texas at Austin. His research interests are in the calculus of variations, geometric measure theory and partial differential equations, including topics like capillarity theory and phase transitions, variational problems in nonlinear elasticity and image reconstruction, mass transportation and symmetrization theory and their applications to geometric and functional inequalities. He has received his PhD in Mathematics from the University of Florence, Italy, in 2004. Before joining the University of Texas at Austin in 2012, he has served as assistant professor (from 2005 to 2010) and then as associate professor (2011) at the University of Florence, and as assistant professor (2004) at the University of Duisburg-Essen, Germany.
